Subject: Modesto Superfund Site - maintenance needed for monitoring well

Good morning,

I hope all is well with you and your family. I received your contact information from Tim Mathein of AECOM, as the manager of the monitoring program for the Modesto Superfund site. The City received a notification that MW-16A is missing a lid. Is this something that you can address? If not, can you point me in the right direction?

Thank you,

Tamorah Bryant, P.E.
Assistant City Engineer
